

Security Tokens: Cryptonite for Stock Certificates

June 6, 2019

Executive Summary:

The price of Bitcoin has jumped by over 120% since the beginning of the year, leading many to conclude that the bear market in crypto is over. The market has not been this frothy since 2017, when we witnessed an extraordinary boom in the price of all crypto assets, as investors poured money into the market hoping to get in early with the next Bitcoin or Ether. At the same time, tech teams dreamt up new use cases for utility tokens that leverage blockchain technology and raised money to fund them via initial coin offerings (ICOs). The bubble burst in early 2018, precipitated by the revelations of fraudulent activity, regulatory action and the reemergence of rational thought by investors. Bitcoin fell by 75% and Ether and other crypto assets were down even more.

While the crypto spring may now be upon us, it does not mean we will see a return to the ICO boom. Since 2017, regulators in the U.S. and around the world have cracked down on these token launches, which they often consider to be unregulated securities offerings. This does not represent the end of tokenization, however. Many companies are now focusing on building technology and an ecosystem for security tokens. These new tokens are digital securities recorded on a blockchain and issued in full compliance with the securities regulations in the jurisdiction in which they are offered. In this way, security tokens can be thought of as the convergence of crypto, enterprise blockchain and traditional finance.

This Greenwich Associates research looks into the emerging market for security tokens, identifying the most promising applications, key advantages and leading players in the space.

Methodology:

Between March and April 2019, Greenwich Associates interviewed 114 executives active in the blockchain and financial technology space across all of North America, Europe, Asia Pacific, and the Middle East & Africa. Seventy percent of respondents were actively involved in security token initiatives. In addition, this paper leverages data from the Greenwich Associates 2019 Equity Portfolio Manager Study, including interviews with 56 portfolio managers and analysts located in North America, Europe and Asia.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
