

ETFs Present New Challenges for Equity Trading Desks

January 21, 2020

Executive Summary:

The growth of exchange-traded funds over the last 25 years has been one of the biggest secular trends in investing. Closely tied to the rise of passive investment management, ETFs allow investors to gain exposure to broad market indices such as the S&P 500 or individual sectors. In recent years, the types of products available have expanded in myriad ways, including ETFs with short exposure, leveraged exposure, style exposure, or ETFs that track different asset classes, countries, and regions—and now, actively managed ETFs.

ETFs have become an essential tool for institutional and retail investors alike. Financial advisors are heavy users of ETFs as they allow them to construct bespoke portfolios according to their client preferences and risk profile, or to provide smart beta exposure while the advisor layers on active bets. Institutional investors are also increasing exposure to ETFs, with [allocations among U.S. institutions rising to 24.8%¹](#) of total assets in 2018 and to [15% among European institutions²](#), according to recent Greenwich Associates research.

According to ETFGI, there are over 2,000 ETFs available in the United States and only slightly fewer in Europe. ETFs now represent up to 30% of average daily volume in U.S. equity markets and about 10% in Europe.

These numbers are only set to increase in the U.S. with the new “[ETF rule³](#)” coming into force that seeks to reduce costs and time to market for ETF issuers.

With volumes at such record levels, ETF trading is becoming an important focus for both buy-side and sell-side desks. In this Greenwich Report, we look into the latest ETF execution trends among institutional equity trading desks.

Methodology:

Between July and September 2019, Greenwich Associates interviewed 60 buy-side equity traders in the U.S. and Europe. Respondents were asked a series of questions about their usage and execution preferences for ETFs.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
