

Derivatives Market Structure 2020

March 11, 2020

Executive Summary:

The global derivatives market has undergone tremendous change over the past decade and, by most measures, has come out more robust and efficient than ever. Increased transparency, more central clearing and vastly improved technology for trading, clearing and riskmanaging everything from futures to swaps to options has created an environment in which nearly 80% of the market participants in this study believe liquidity in 2020 will only continue to improve.

To understand more deeply where we've been and where the derivatives market is headed, Greenwich Associates conducted a study in partnership with FIA, an association that represents banks, brokers, exchanges, and other firms in the global derivatives markets. The study gathered insights from nearly 200 derivatives market participants—traders, brokers, investors, clearing firms, exchanges, and clearinghouses—examining derivatives product usage, how they manage their counterparty relationships, their expectations for regulatory change, and more.

The results painted a picture of an industry with the appetite and opportunity for growth, but also one with challenges many are eager to see overcome. The approaching Libor transition, continued rollout of uncleared margin rules, ongoing concern about capital requirements, and a renewed focus on clearinghouse “skin in the game” are on the minds of most derivatives market participants. Each of these issues contain as many opportunities for the market as complexities and, ultimately, will help the market safely grow as derivatives maintain their critical place in global finance.

The results also provided important insights into the dynamics of derivatives clearing as a business. Clearing firm respondents said they are investing in growth by extending their services into new geographies and expanding the scope of the products they clear. But they are setting a higher priority on making improvements to their internal workflows and client service. That reflects one of the key findings from customers: 64% cited “quality of operational processes” as an important measure for their clearing firm relationships.

Methodology:

This research is based on data collected from 189 derivatives market participants between November 2019 and January 2020. Respondents include asset managers, hedge funds, broker-dealers, clearing firms, proprietary trading firms, exchanges, clearinghouses, and other industry participants. Questions asked were

about their habits, opinions and expectations for the global derivatives markets in the next 3–5 years. Greenwich Associates collaborated with FIA to both develop the questionnaire and to gather responses from key industry participants.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
