

The Elephants in the Dealing Room: A Study of Corporate Clients in FX

June 23, 2020

Executive Summary:

One of the pleasures of writing about foreign exchange market structure is that it routinely defies convention. In some cases, it defies definition altogether. Its global nature, fractured regulatory regime and the interests of many of its participants obscure FX market structure making it difficult to comprehend.

Take something as trivial as market size: The absence of any reporting requirements means that the industry only gets a reliable average daily volume estimate once every three years from the BIS—and even this is disputed from the moment it is published. What is true of the whole is also true of the parts. In FX, there are whole segments of the customer base who avoid systematic scrutiny simply because the data is hard to come by.

Corporates are one such segment. Corporations are arguably the most important customer segment in FX, and we have noted in other research the lengths to which banks and platforms will go to retain them. After all, they are the ultimate end user, and for them, FX is largely a cost.

This Greenwich Report examines how corporations think about FX and how this influences their trading behavior relative to financial investors, who are more often in the market structure spotlight.

Methodology:

Throughout June and July 2019, Greenwich Associates interviewed 97 FX investors as a part of our annual Market Structure and Trading Technology Study. Respondents were asked how they select an FX trading platform, how they determine quality execution, as well as the influences for selecting an FX algo. In addition, Greenwich Associates conducted electronic interviews in the second half of 2019 with 76 corporate treasury executives from large, industry-leading multinationals based in the United States to explore the evolving role of the corporate treasurer. Topics included how corporate treasurers' objectives are defined, what methods and tools they use to achieve those objectives, and where there may be shortcomings in the tool set. In addition, we conducted several qualitative interviews via in-depth conversations in order to dive more deeply into how specific corporate treasury staff manage their risks.

This Document is prepared by Crisil Coalition Greenwich, which is a part of Crisil Ltd, a company of S&P Global. All rights reserved. This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not

form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
