

# July Spotlight: Back to the Future: Credit E-Trading Share is Back in a Big Way

July Data Spotlight: U.S. Credit

July 20, 2020

Executive Summary:

In June, the United States added significant social upheaval to a year that had already seen major economic change marked by extraordinary federal intervention. Despite the intensity of activity on a variety of fronts, the credit markets began to get back to business. Even if this was not “business as usual” per se, it was at least trending that way.

Methodology:

Greenwich Associates continuously gathers data and insights from credit market participants, including market makers, primary dealers and trading platforms. The data, once aggregated, normalized and enhanced, is analyzed by our market structure research team who identify the key trends of trading in the credit markets, with a focus on corporate bond electronic trading and trading platform market share.

The data reported in this document reflect solely the views reported to Greenwich Associates by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Greenwich Associates compiles the data received, conducts statistical analysis and reviews for presentation purposes in order to produce the final results. Unless otherwise indicated, any opinions or market observations made are strictly our own.
