

Trade Surveillance Solutions: Evolved, Effective and Essential

August 27, 2020

Executive Summary:

The persistent growth trajectory of the trade surveillance technology market has surprised many industry participants. In the years immediately following the 2008 global financial crisis, most markets (with the notable exception of Canada) were reluctant to adopt surveillance solutions despite the increase in regulatory mandates and growing focus on protecting market integrity. Major factors contributing to financial firms' cautious approach included regulatory uncertainty and lack of direct correlation to profitability. From a budgeting perspective, ROI can be difficult without an easily quantifiable "return" component.

However, the benefits of automation and advanced surveillance technology soon became clear, as did the consequences of failing to monitor trading activity and employee communications. Far beyond the threat of any regulatory fine, the consequences of reputational risk proved to be dire enough to drive more adoption of proactive surveillance and monitoring technology, resulting in an estimated 13% to 14% CAGR in global surveillance spending across financial industry segments.

As demand for surveillance technology increased, so did the influx of new entrants attempting to win share in this growing market. Clear market leaders emerged early on, but after a decade of focused development, customer demand for customization, market coverage, and data source integration has created increasing opportunities for emerging offerings to achieve market share footholds in various firm segments. In 2020, third-party surveillance technology solutions offer a variety of coverage options and price points, but the right match for a firm's specific needs can be difficult to discern.

Methodology:

Between March and June 2020, Greenwich Associates senior analysts conducted in-depth, proprietary analysis of vendor solutions, based on detailed information collected through a standardized request for information (RFI) process, as well as telephone interviews and live demo participation, with the nine vendors participating in this research.

Additionally, in the second quarter of 2020, we conducted over 30 interviews with U.S.-based representatives from banks, broker-dealers, buy-side firms, exchanges, regulators, and financial technology providers. These interviews focused on the operational and functional challenges experienced by compliance teams during the unfolding events of the COVID-19 crisis, and informed the qualitative analysis expressed in this report, along with other proprietary Greenwich Associates market research.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the

trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
