

Bond Dealers Adapt Through an Unprecedented 2020

October 27, 2020

Executive Summary:

The first half of 2020 proved to be the biggest test to date for the newly electronic fixed-income market structure. While official sector intervention was clearly needed to stabilize markets in March 2020, the infrastructure for trading corporate and municipal bonds proved impressively robust. Clients were reminded how important their dealer relationships were, while at the same time electronic trading platforms showed they could handle what turned out to be historic trading and data volumes.

Nevertheless, the market shock forced all market participants to rethink various aspects of their business and operating models. The widely held belief that traders could never work from home has clearly been debunked. Perceived volume limits for fixed-income electronic trading were all broken. The toolkit of the Federal Reserve proved to be considerably bigger and more diverse than the market ever imagined.

Also, it's been made clear that relationships really matter—not just for access to new issues or balance sheet, but for help in understanding what in the world is going on. The bond market has absolutely been transformed by technology over the past decade—that is undeniable. But trading bonds is still very much a people business, where understanding your customer matters, even if technology and data help with that understanding.

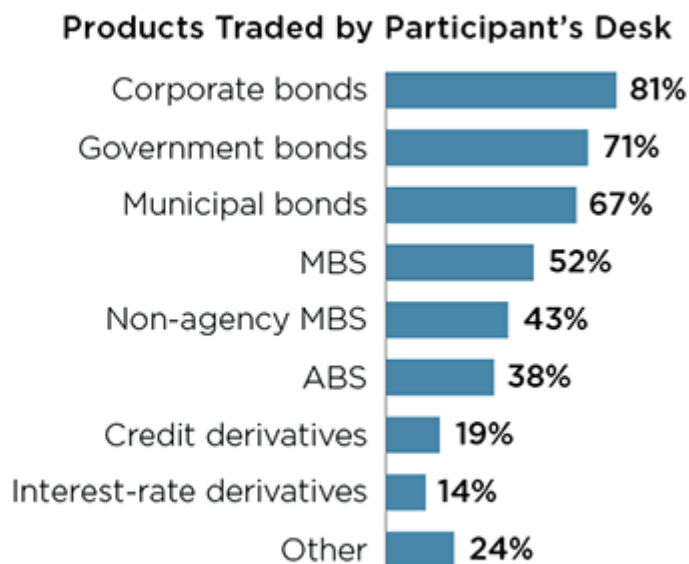

This study, conducted in the summer of 2020, examines the growth priorities, technology spending and market structure views of regional and middle market corporate bond and municipal bond dealers in the United States. While this group is diverse by definition, including some banks that are truly global and others that are particularly focused on a single region of the U.S., their participation in the bond market is critical and continues to evolve along with the overall market.

Methodology:

Greenwich Associates, in partnership with BDA, sought responses from key corporate bond and municipal bond dealers in the United States (including BDA member firms). Interviews were collected from 21 firms

during July and August 2020 via an electronic survey. This research examines the impact of the COVID-19 crisis on fixed-income trading desks, corporate bond and municipal bond market structure, the use of technology, the evolving skillset of sales and trading professionals, and the evolution of operating a sell-side trading desk.

RESPONDENTS

Note: Based on 21 respondents.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
