

December Spotlight: U.S. Treasury Volumes Revert to “Normal” with Clients Leading the Way

December Data Spotlight: U.S. Treasury Trading

December 11, 2020

Executive Summary:

As the end of the year quickly starts to wrap up, we take a look at the macro factors, derivatives activity and electronic trading impacting the U.S. Treasury market.

Methodology:

Greenwich Associates continuously gathers data and insights from U.S. Treasury market participants, including asset managers, hedge funds, primary dealers, market makers, and trading platforms. The data, once aggregated, normalized and enhanced, is analyzed by our market structure research team who identify key areas of change and the likely direction of volume, holdings, market share, and other trends in the coming months.

The data reported in this document reflect solely the views reported to Greenwich Associates by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Greenwich Associates compiles the data received, conducts statistical analysis and reviews for presentation purposes in order to produce the final results. Unless otherwise indicated, any opinions or market observations made are strictly our own.
