

The Next Phase of Marketplace Lending

Transparency and Trading

March 30, 2021

Executive Summary:

The personal loan market proved remarkably resilient over the past year, despite early concerns that the COVID-19 crisis would create a spike in defaults. Government intervention and the prioritization of loan payments by consumers kept defaults lower than expected, leaving the market on solid footing heading into what will hopefully be a global markets recovery in 2021.

The coming months will also bring continued innovation in one of the most interesting segments of the personal loan market—marketplace lending. With fintech firms now at the heart of nearly 40% of personal loans, their impact on the asset segment is growing and increasingly drawing in institutional investors who, in the past, have seen the market as too small or lacking in transparency.

A virtuous cycle is now in the making to rectify those issues, however, as a focus on data has drawn in both greater issuance and allowed for the creation of a transparent secondary market for trading these loans after issuance. The ability for investors to trade loans after their initial purchase, with the comfort that the price paid reflects its true value, will result in more demand for new issuance as market transparency grows. LendingClub, for one, is driving such ideas forward, which we expect will attract not only long-term investors but institutional market makers always seeking a new market in which to apply their quantitative trading skills.

Key Findings

Low interest rates globally are driving investors to look for higher-yielding assets, while market volatility has increased demand for investments that are uncorrelated to traditional stocks and bonds. Marketplace loans provide answers to both of those problems, and if the technology innovations and market conditions continue on their current path, this is a market with a lot of room to run.

Methodology:

Greenwich Associates spoke with more than a dozen institutional investors, banks and market makers between November 2020 and January 2021 to understand their views of marketplace lending, current participation in the market and appetite for increased participation going forward. Conversations included data availability, views on market transparency, requirements for making markets, and roadblocks to investing in the asset class in a meaningful way.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
