

The Modernization of Mobile Apps

Financial Markets Professionals Seek Continuity of Experience

October 11, 2022

Executive Summary:

Mobile apps have moved beyond the realm of retail investors into professional financial services. What was previously a gradual embrace of mobile apps accelerated dramatically during the pandemic. Based on the results of new research, Coalition Greenwich estimates that the pace of adoption of communication and collaboration technology platforms in financial services has accelerated by five years or more in the space of 12–24 months. Today, institutional capital markets professionals have become heavy users of mobile applications, as have financial advisors (FAs), compliance personnel and professionals in a variety of other front- and back-office roles.

These professionals are using mobile apps as an extension of the desktop experience, allowing even the most desk-centric analysts, portfolio managers (PMs), traders, and salespeople to effectively work from anywhere at any time.

In this report, we present the results of our comprehensive study of the use of mobile apps by financial service organizations and professionals, including an analysis of usage within individual asset classes and across professional functions. We identify the features and functionality valued most highly by financial professionals, and show which apps and providers are used most by professionals in a variety of roles. We also look at the downsides of mobile apps, like the stresses of an “always on” mentality, and examine tools the industry is using to minimize the impact on employee work-life balance.

Finally, we project how mobile apps will evolve in the years to come. With hybrid work arrangements seemingly here to stay and an increasing need across financial markets for uninterrupted connection, we expect mobile apps to continue to proliferate in the industry at a rapid pace. Given that trajectory, we conclude by presenting three guiding principles for mobile app developers looking to deliver the optimal experience to financial service professionals.

Methodology:

In 2Q 2022, Coalition Greenwich conducted a research study of institutional capital markets professionals and financial advisors to better understand the current and future use of mobile apps, mobile app capabilities and coverage, expected features and functionality, as well as the most commonly used mobile apps. We interviewed 106 professionals in 16 different countries across North America, Europe and Asia. Participants included 36 portfolio managers/analysts, 51 sales and trading professionals, and 19 compliance professionals. Also in Q2 2022, responses were gathered from 111 financial advisors in 11 different countries across North America, Europe, and Asia.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those

companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
