

Large Corporates More Committed to Current Cash Management Providers

October 4, 2023

The relationship between large corporates and their cash management providers is becoming stickier with large corporates in the United States, Europe and Asia, evincing a reduced propensity to change providers. These findings are based on interviews with large corporates with a turnover of at least \$2 billion, as presented in recent research by Coalition Greenwich.

Only 36% of large U.S. corporates expect to change their cash management providers today as compared to 50% four years ago, based on conversations with treasury and finance professionals as part of our U.S. Large Corporate Finance Study. This brings them in line with their counterparts in Europe and Asia.

Percentage of Large Corporate Cash Management Companies Expecting to Move Business

Note: Asia-Pacific based on 629 respondents in 2019, 719 in 2020, 777 in 2021, and 829 in 2022. Western Europe based on 1,013 respondents in 2019, 918 in 2020, 912 in 2021, and 806 in 2022. United States based on 425 respondents in 2019, 327 in 2020, 299 in 2021, and 278 in 2022. Evaluations are on a 5-point scale from Excellent through Poor with a point score that weights those evaluations as follows: 100 – Excellent, 50 – Above average, 25 – Average, 12.5 – Below average, and 0 – Poor. Key Drivers of Stickier Bank-Firm Relationships

One of the key reasons for this is digitization. As corporates adopt proprietary bank platforms and complex products that require significant investment, they are less likely to move their business. This strengthens existing bank-firm relationships and works in favor of leading banks that have the product capabilities to meet the growing complexity of these corporates' needs, especially in areas like cross-border cash management.

There's also the fact that historically, corporates are less likely to move business from strong and established relationships during times of economic uncertainty.

Customer Service, Pricing and International Network Are Top Selection Criteria

Customer service and ease of doing business are the paramount attributes corporates seek when selecting a cash management provider. That's apart from pricing, of course. Cash management continues to be an extremely price-sensitive market—this factor is regaining importance after a small decline seen during the pandemic.

Key Selection Criteria for Corporates when Choosing a Cash Management Provider

Note: Asia-Pacific based on 385 respondents in 2020, 369 in 2021 and 481 in 2022. Western Europe based on 147 respondents in 2020, 145 in 2021 and 149 in 2022. United States based on 88 respondents in 2020, 68 in 2021 and 65 in 2022.

There are some regional differences, though. A bank's international network is important for large corporates in Europe, given the high volume of cross-border transactions there, and for those in the export-oriented markets of Asia.

For large corporates in the U.S., meanwhile, the size of the credit commitment is a top criterion for cash management and treasury services. Again, this works in favor of the big banks, which have both the capabilities and balance sheet strength to anchor themselves in the relationship with the corporates.

Corporates who wish to share their perceptions in the U.S. Large Corporate Finance Study can do so by reaching out to us at contactus@greenwich.com. In recognition for sharing their perspective, participants will receive access to the Greenwich Exchange, an experience and source for connecting financial professionals to industry insights. This access includes robust, trended and actionable data to inform decision-making and enhance relationships with banks.

The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
