

Corporate DBs Move to Secure Funded Status Gains and Begin Endgame

November 29, 2023

Executive Summary:

The sharp rise in interest rates has increased the discount rate for U.S. pension plans, lowering plan liabilities and pushing most corporate defined benefit (DB) plans to fully funded status. This historic shift has changed the goal for most corporate DB plan sponsors from maximizing investment returns relative to their liabilities to maintaining their newly healthy funding ratios and minimizing volatility.

However, many corporate pension plans—including those that devote a majority of assets to liability-driven investments (LDI)—still have asset allocation profiles built for the previous low-rate, low-yield, lower funded status environment. As a result, a significant number of the corporate plan sponsors taking part in a new study from Coalition Greenwich are re-evaluating their current lineup of LDI managers. In an effort to secure funded status gains, many are looking at issues such as excessive overlap in holdings, inadequate hedging of liabilities and insufficient downside protection in their LDI manager lineup.

This report provides the complete results of that study, including data on plan funding ratios, plan sponsor challenges and investment priorities, and strategies that plan sponsors are using to diversify LDI manager rosters and otherwise prepare their plans for this new phase of pension plan management.

Methodology:

From August through October 2023, Coalition Greenwich conducted 30 interviews with institutional investors targeting key decision-makers at corporate DB plans based in the United States to understand how they manage diversification and plan/funding risk, select an LDI manager and navigate overall risks on the economic horizon. As part of this study, Coalition Greenwich also held in-depth discussions with some of the world's biggest and most prominent investment consultants. Throughout this report, we present excerpts from those interviews that present perspectives from these informed and influential intermediaries.

The study that is the basis for this report was commissioned by Franklin Templeton. Coalition Greenwich/CRISIL is not affiliated with Franklin Templeton.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
