

Derivatives Market Structure 2024: Focusing on Capital and Workflow Efficiency

March 11, 2024

Executive Summary:

The derivatives market in 2024 will focus on increasing efficiency in response to key global and industry drivers that are adding costs and risks to trading desks. At the same time, opportunities for growth are also forcing technology responses that will help manage through the key challenges that participants state will shape the future of the market.

Global headwinds are driving efforts across the industry to become more efficient with how capital is used and how trades are processed. Artificial intelligence (AI) is another hot topic for the industry, but when asked about the potential impact on their own workflows, study respondents expect just as much impact and possibly more from industry-specific trends, such as standardization of operational processes and the use of tokenization in collateral management.

There are overlapping efforts to mitigate the effect of new regulations; the ability to optimize collateral can improve the performance of a trading desk but is also an operational and data challenge that requires investment in new tools. Derivatives are an integral component in the financial and asset management ecosystem, and the potential for increasing volatility shines the spotlight directly on support of these instruments.

This report is based on a study conducted by Coalition Greenwich in partnership with FIA, the leading trade association for the futures, options and centrally cleared derivatives markets. FIA's membership includes clearing firms, exchanges and other market participants from more than 40 countries.

This research provides a unique perspective into the key drivers for the global derivatives clearing business. The research reveals industry sentiment on several external factors and industry trends that are impacting the health of the clearing industry and the outlook for further growth. Coalition Greenwich and FIA identified three main subsets within the responding institutions: end users, which include asset managers and hedge

funds; intermediaries, which include brokers, dealers and clearing firms; and infrastructures, which include exchanges and clearinghouses.

Methodology:

These findings are based on interviews conducted between November and December 2023 with 210 derivatives market participants and experts sourced from the Coalition Greenwich network and the FIA community. The research includes findings from 50 professionals working at asset managers, hedge funds and other end users, and 87 professionals working at clearing firms, brokers, swap dealers, and other intermediaries. Of the remaining 73 professionals from other types of market participants, 31 work at exchanges, clearinghouses and other market infrastructure operators. The majority are focused on exchange-traded derivatives, but many are involved with cleared OTC derivatives such as interest-rate swaps. Half are based in North America, the other half split between Europe and Asia-Pacific. Questions explored the key drivers of change in the derivatives market, strategic priorities, challenges in today's market, and how firms will respond to regulation and other market drivers going forward.

Respondents

Note: Based on 210 respondents. Numbers may not total 100% due to rounding. Segments with values <3% are not labeled.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research

participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
