

Operations Data-Sharing: A Critical Time to Innovate

September 24, 2024

Executive Summary:

Data-sharing methods are evolving in the back offices of capital markets firms. While many operations professionals still rely on traditional methods, including file transfer protocol/secure file transfer protocol (FTP/SFTP) files to support end-of-day batch processing, the industry is shifting closer to real-time data-sharing and more efficient workflows to accommodate today's market dynamics.

In light of these developments, Coalition Greenwich, in collaboration with Axoni, explores data-sharing practices of operations professionals at firms consuming and producing data. In our analysis, "consumers" of data include buy-side firms, banks and broker-dealers that receive bulk trading or post-trade reports. Meanwhile, exchanges, trading venues, market data providers, fintechs, and central counterparty clearing houses (CCPs) are categorized as "producers" of data and are primarily the sources of large volumes of data to their consumers.

Methodology:

Between May and July 2024, Coalition Greenwich conducted a study using an electronic questionnaire and qualitative interviews to explore the data-sharing practices of 52 firms in the United States and the United Kingdom, including 36 firms that are "consumers" of data (asset managers, hedge funds, banks, broker-dealers), and 16 "producers" of data (exchanges, trading venues, CCPs, fintechs, and market data firms).

Respondents

Note: Based on 52 total respondents: 36 consumer firms and 16 producer firms. Segments with values <3% are not labeled.

Appendix: Cost of Manual Processes Methodology

In all cases, cost analysis is derived from the number of staff included in the reconciliation process, typical annual salaries of full-time employees (FTEs) according to seniority, typical mix of junior, mid-level and senior people per team, and the percentage of time spent during a typical workweek dealing with manual interventions as follows:

- Junior FTEs*annual salary*%manual task(s) + Mid-level FTEs*annual salary*%manual task(s) + Junior FTEs*annual salary*%manual task(s) + Senior FTEs*annual salary*%manual task(s)
- Junior salary ranges are estimated at \$60,000/year
- Mid-level salary ranges are estimated at \$80,000-\$100,000/year
- Senior salary ranges are estimated at \$125,000-\$150,000/year
- We assume roughly three to four junior and mid-level FTEs per senior FTE

The percentage of time spent during an average week on manual tasks, the number of FTEs involved in reconciliation per operations team, and the mix of asset classes and products the team is responsible for are provided by respondents.

Coalition Greenwich, a division of CRISIL, an S&P Global Company, is a leading global provider of strategic benchmarking, analytics and insights to the financial services industry.

We specialize in providing unique, high-value and actionable information to help our clients improve their business performance.

Our suite of analytics and insights encompass all key performance metrics and drivers: market share, revenue performance, client relationship share and quality, operational excellence, return on equity, behavioral drivers, and industry evolution.

About CRISIL

CRISIL is a leading, agile and innovative global analytics company driven by its mission of making markets function better. It is majority owned by S&P Global Inc., a leading provider of transparent and independent ratings, benchmarks, analytics, and data to the capital and commodity markets worldwide.

CRISIL is India's foremost provider of ratings, data, research, analytics, and solutions with a strong record of growth, culture of innovation, and global footprint.

It has delivered independent opinions, actionable insights and efficient solutions to over 100,000 customers through businesses that operate from India, the U.S., the U.K., Argentina, Poland, China, Hong Kong, and Singapore.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this

Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
