Do-It-Yourself Software Loses Its Luster

November 17, 2014

Executive Summary:

With legacy infrastructure already in place, many financial services firms regard technology outsourcing with suspicion. But back-office processing and running financial models in the cloud are only two examples of outsourcing slam-dunks for institutional investors.

Execution and order-management systems, transaction cost analysis (TCA) and surveillance platforms are also available commercially in such a way that building something better and cheaper in-house is nearly impossible.

The data reported in this document reflect solely the views reported to Greenwich Associates by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Greenwich Associates compiles the data received, conducts statistical analysis and reviews for presentation purposes in order to produce the final results. Unless otherwise indicated, any opinions or market observations made are strictly our own.
