

# Advisors must balance tech and touch for investor engagement

2025 Global Investor Study

September 12, 2025

Executive Summary:

**54%** of investors say engagement with their advisors through social media is important, up from 47% in 2021

Relationships between financial advisors and their investor clients are being reinvented by the rapidly expanding use of technology. At the same time, advisors need to strike a balance between leveraging technology and maintaining a personal touch in their client relationships.

As we look to the future of financial advisor relationships, our study reveals a complex and evolving landscape. Investors across the globe are receptive to technology as an enabler of financial advisors, but not a replacement. Amid this boom, 75% of global investors across all wealth tiers—such as mass market, mass affluent, high net worth (HNW), and ultra-high net worth (UHNW)—continue to rely on financial advisors, up from 72% in 2021. Advisor adoption by investors confirms that advisors are effective in solving client needs and meeting client expectations. How investors find their advisors differs, with 60% sourcing their advisor from their bank, while 40% use an independent advisor or wealth manager.

However, there is still some dissatisfaction with the advisor relationship. Notably, 29% of investors are considering a change to their advisor in the next 12 months, driven by the investor's desire for access to investment products (ETFs, crypto, ESG, etc.), new technologies (including artificial intelligence (AI) and machine learning (ML)), as well as general concerns around fees and service. With some investors interested in changing advisors, the importance of referrals is paramount, outranking branding for new client development.

Social media is increasingly influential in the advisor relationship as well, with 54% of investors finding social media interaction important, up from 47% in 2021, and close to a third saying it is extremely important to the advisor relationship. Investors are engaging with their advisors on a variety of social media platforms, with almost all platforms growing in importance.

However, technology is not a replacement for an advisor, as investors continue to seek face-to-face meetings with and electronic communications from their advisors for investment advice, with 53% of investors citing the importance of face-to-face meetings. While technology is ubiquitous, investors find value in a financial advisor who can provide interactive and customized products and service offerings.

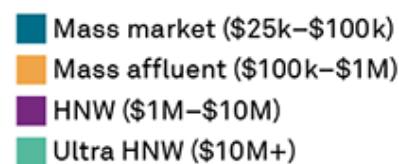

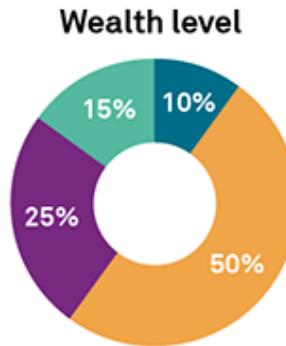

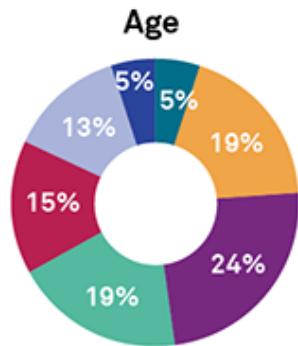

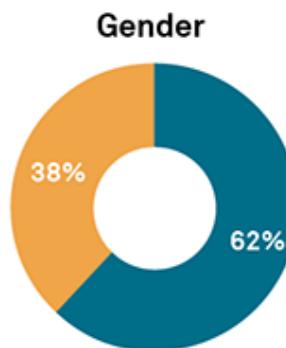

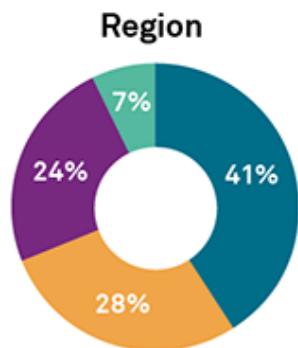

At its core, the financial advisor relationship is about time invested and personal attention to the client. And while technology can enable better delivery, global investors are also saying that the personal touch and face-to-face meetings matter as much as ever.

Advisors should focus on delivering personalized advice, access to emerging products (e.g., crypto, ESG) and technology-enabled services to meet the evolving needs of investors and retain clients in a dynamic market. According to our research, advisors should leverage the power of social media beyond delivery of content to serving as a referral network for access to new clients who are considering switching (29% of the advisor market) or who have never used an advisor before (25% of the entire global market).

#### Methodology:

During February and March of 2025, Crisil Coalition Greenwich, in partnership with LinkedIn, conducted 2,065 in-depth interviews with investors in 16 different countries across North America, Europe, the Middle East and Africa (EMEA), Asia-Pacific (APAC), and Latin America (LatAm). The study focused on the advisor-investor relationships across different age groups, wealth and income levels. Wealth included the full spectrum of mass market, mass affluent, HNW, and UHNW investors. Produced for LinkedIn by Crisil Coalition Greenwich.

## Respondents

Note: Based on 2,065 respondents.

The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not

form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
