

The human edge in electronic markets

June 30, 2026

Executive Summary:

Institutional trading desks now operate within a market environment driven by speed, scale and steadily advancing electronic tools. Algorithms source liquidity, execution management systems streamline workflows, and post-trade processes are more standardized than they were a decade ago. By conventional measures, this has created a more automated landscape.

Despite these technological advancements, human expertise remains central to how the buy side evaluates counterparties. What stands out for clients is the quality of service that surrounds that technology: strong execution judgment, responsive coverage, deep product knowledge, and an understanding of how a particular desk operates. Traders want a human element even when trading electronically.

This is true, to varying degrees, across the full range of asset classes. As desks navigate across equities, credit, FX, and rates—and both cash and derivative instruments—the operational and market-structure complexities multiply. Traders need efficient tools, but they also require support from counterparties who understand when a flow can stay electronic and when it needs a more hands-on approach. In practice, the most effective trading relationships combine both.

Liquidity access remains vital, and clearing and settlement continue to be important parts of the workflow. However, when traders are asked what matters most, they emphasize execution performance and the quality of human coverage around those outcomes. As one noted, “Orders get sent to brokers that make it easy.”

Methodology:

Between July and August 2025, Crisil Coalition Greenwich interviewed 90 multi-asset buy-side traders at funds domiciled in North America, Europe and Asia. Respondents were asked a series of questions to better understand the distinct approaches of trading desks when trading with counterparties offering single-asset verses multi-asset desks.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial

products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
