Electronic trading of bonds is growing – sort of…

February 18, 2014

We all know that the massive reduction in dealer inventories and the cost of capital has had a huge negative impact on liquidity in the corporate bond market. While the primary market has helped soften the blow, that crutch isn't going to be here for long as rates start to rise over the next few months and years. Hence the renewed marketplace talk of corporate bond electronic trading.

Our global fixed income study, based on 4000 interviews with global PMs and traders, did find that more market participants are trading fixed income products electronically, however the total volume put through those platforms has in fact declined. While that top line finding is interesting, its the product level details that tell the story in a more accurate way. Electronic trading in US Treasuries in on the rise amongst institutional investors for example. This makes sense from macro economic perspective, but also because on-the-run US Treasuries are standard and highly liquid.

The corporate bond story shows notably regional differences. While our research found that e-trading volume is down in the US, its up in Europe (you'll have to read the report for our explanation as to why). While e-trading calculations using TRACE volumes (which includes smaller size trades not captured by our institutional interview base) show a slightly more rosy picture in the US (more on this in a later post), but they still show that while the market is in source of better corporate bond liquidity, the market structure has not changed in such a way that a burst of e-trading growth can be expected.

Bloomberg News did a great write-up on the research as well. The report is available for Greenwich Market Structure and Technology clients, but comments and thoughts are welcome from all.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this

Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
