

The Technology to Succeed in Fixed-Income Trading

October 3, 2017

Executive Summary:

Technological prowess is increasingly defining the winners and losers in the fixed-income business. Those global and regional dealers that have seen their market share grow over the past 10 years are largely those that have invested heavily in technology—allowing them to manage the market and service their customer better than their peers. Nonbank liquidity providers, which have also become a major force in fixed-income trading despite their small size relative to their bank peers, have done so largely due to superior technology.

Further, the lingering low-rate and low-volatility environment has hurt dealer profit margins, as volume remains depressed while the profitability per trade is shrinking. Although individual dealers have little control over the total market volume, picking up a greater share of the available client revenue pool and also reducing their cost per trade via technology is increasingly necessary.

As such, while building trust with clients is still a critical part of the fixed-income business, investing in technology that increases distribution while reducing costs is required. Whereas real-time pricing and automatic hedging were, until recently, only available to those with big technology teams and budgets to build them in-house, third-party providers are now paving the way for a longer list of fixed-income dealers to up their game—and profitability. Nothing can completely replace trust, human intuition, scale, and balance sheet, but moving forward without technology is no longer necessary or even feasible.

Methodology:

In Q3 2016 and Q2 2017, Greenwich Associates interviewed 173 fixed-income investors, in addition to top-tier broker-dealers and liquidity providers, to better understand the role of technology in the dealer/client relationship in the United States. Conversations examined how the buy-side/sell-side relationship is evolving, the technology currently used by sell-side trading desks and expectations for the future.

We specialize in providing unique, high-value and actionable information to help our clients improve their business performance.

Our suite of analytics and insights encompass all key performance metrics and drivers: market share, revenue performance, client relationship share and quality, operational excellence, return on equity, behavioral drivers, and industry evolution.

About CRISIL

CRISIL is a leading, agile and innovative global analytics company driven by its mission of making markets function better. It is majority owned by S&P Global Inc., a leading provider of transparent and independent ratings, benchmarks, analytics, and data to the capital and commodity markets worldwide.

CRISIL is India's foremost provider of ratings, data, research, analytics, and solutions with a strong record of growth, culture of innovation, and global footprint.

It has delivered independent opinions, actionable insights and efficient solutions to over 100,000 customers through businesses that operate from India, the U.S., the U.K., Argentina, Poland, China, Hong Kong, and Singapore.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise

benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
