

# The Future of the Banker

November 2, 2017

Executive Summary:

Dramatic advances in artificial intelligence (AI) are quickly changing this technology from a banking buzzword to a critical capability that helps drive better outcomes for clients. In the coming years, AI—including machine learning, robotics and other technology platforms—will have a profound impact on nearly all aspects of the banking industry.

This report focuses on the future of “the banker” and presents a series of ideas to guide bank leadership teams in leveraging this new technology to: 1) increase the effectiveness of bankers, 2) help solve for shortfalls in consistency of banker advisory skills, and 3) differentiate their banks by delivering high value-added intellectual capital to clients.

The banking industry and the process by which banks service customers and provide advice to clients will pass through four distinct stages:

1. **Analog Banking**
2. **Business Intelligence**
3. **Artificial Intelligence**
4. **Advanced Artificial Intelligence**

The next couple of years should be good ones for highly skilled bankers. In fact, as banks scramble to differentiate their offerings by providing value-added advice in a time of increasing product commoditization, banks will have trouble finding bankers talented enough to meet their new requirements.

Over a longer horizon, AI platforms will begin to replicate many of the functions now performed by bankers, shifting some banking jobs toward technology and potentially lowering front-office compensation. The leading banks' AI systems will generate high-level, customized recommendations and advice across many lines of business. This will help companies optimize efficiencies throughout their corporate finance and treasury

functions and pinpoint the best growth opportunities based on market conditions and competitive pressures. The AI-aided advice can help anticipate clients needs—even identifying potential M&A targets and partners.

---

**By providing rapid response times, effective error resolution and a human face to an essential business partner, bankers will ensure their central role for decades to come.**

As this change plays out, the number of front-office banker jobs will decrease, the portfolios of individual bankers will expand meaningfully, and the positions of certain types of relationship managers (RMs) and other bankers will diminish in importance. Many roles will shift to more junior professionals, who can manage the bank's tech-focused offerings at a lower cost to the banks.

However, Greenwich Associates believes that bankers/RMs will remain a central part of banks' value proposition, despite the evolution of their roles. Even over the long term, human RMs will be required in a range of roles. These include explaining to commercial customers how the banks' AI and other digital tools work, managing challenging onboarding and implementation projects, navigating inside the bank to marshal required resources and deliver effective solutions, and—perhaps most importantly—picking up the phone/Skype when corporate treasurers, CFOs and other company officials call with questions and requests.

By providing rapid response times, effective error resolution and a human face to an essential business partner, bankers will ensure their central role for decades to come.

## THE FUTURE OF BANKING SERIES

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
